

COLLECTION FOR BUSINESS

PRECIOUS PLASTIC, 2020.

WHO WE ARE?

We are a Precious Plastic collection point. Our mission is to tackle plastic pollution. We collect plastic from people and businesses so it doesn't go to waste. The collection is run by a group of people, not corporate or government. We give the plastic we collect a new life, transforming it into products and raw material. Besides, collecting plastic our goal is to inform and educate society on plastic pollution and how to solve this global problem.

We collect plastic waste from people and businesses so it doesn't go to waste. With the plastic that we collect, we create new products and raw material. Closing the loop and preventing it from going to waste, being burned or polluting our environment. In addition, we contribute to the local economy and make sure that the plastic will not ship away.

Are you ready to join the other local businesses and make sure the plastic waste you produce doesn't become a problem?

You can donate your plastic waste to our Collection point. But remember needs to be in good condition in terms of cleaning. It must be easy for us to sort.

CAN WE USE YOUR PLASTIC?

Plastic comes in many different types. Unfortunately, not all can be recycled. We can help you find out which of your plastic can be recycled properly. Show us the plastic waste created by your business and we can tell you where we can help.

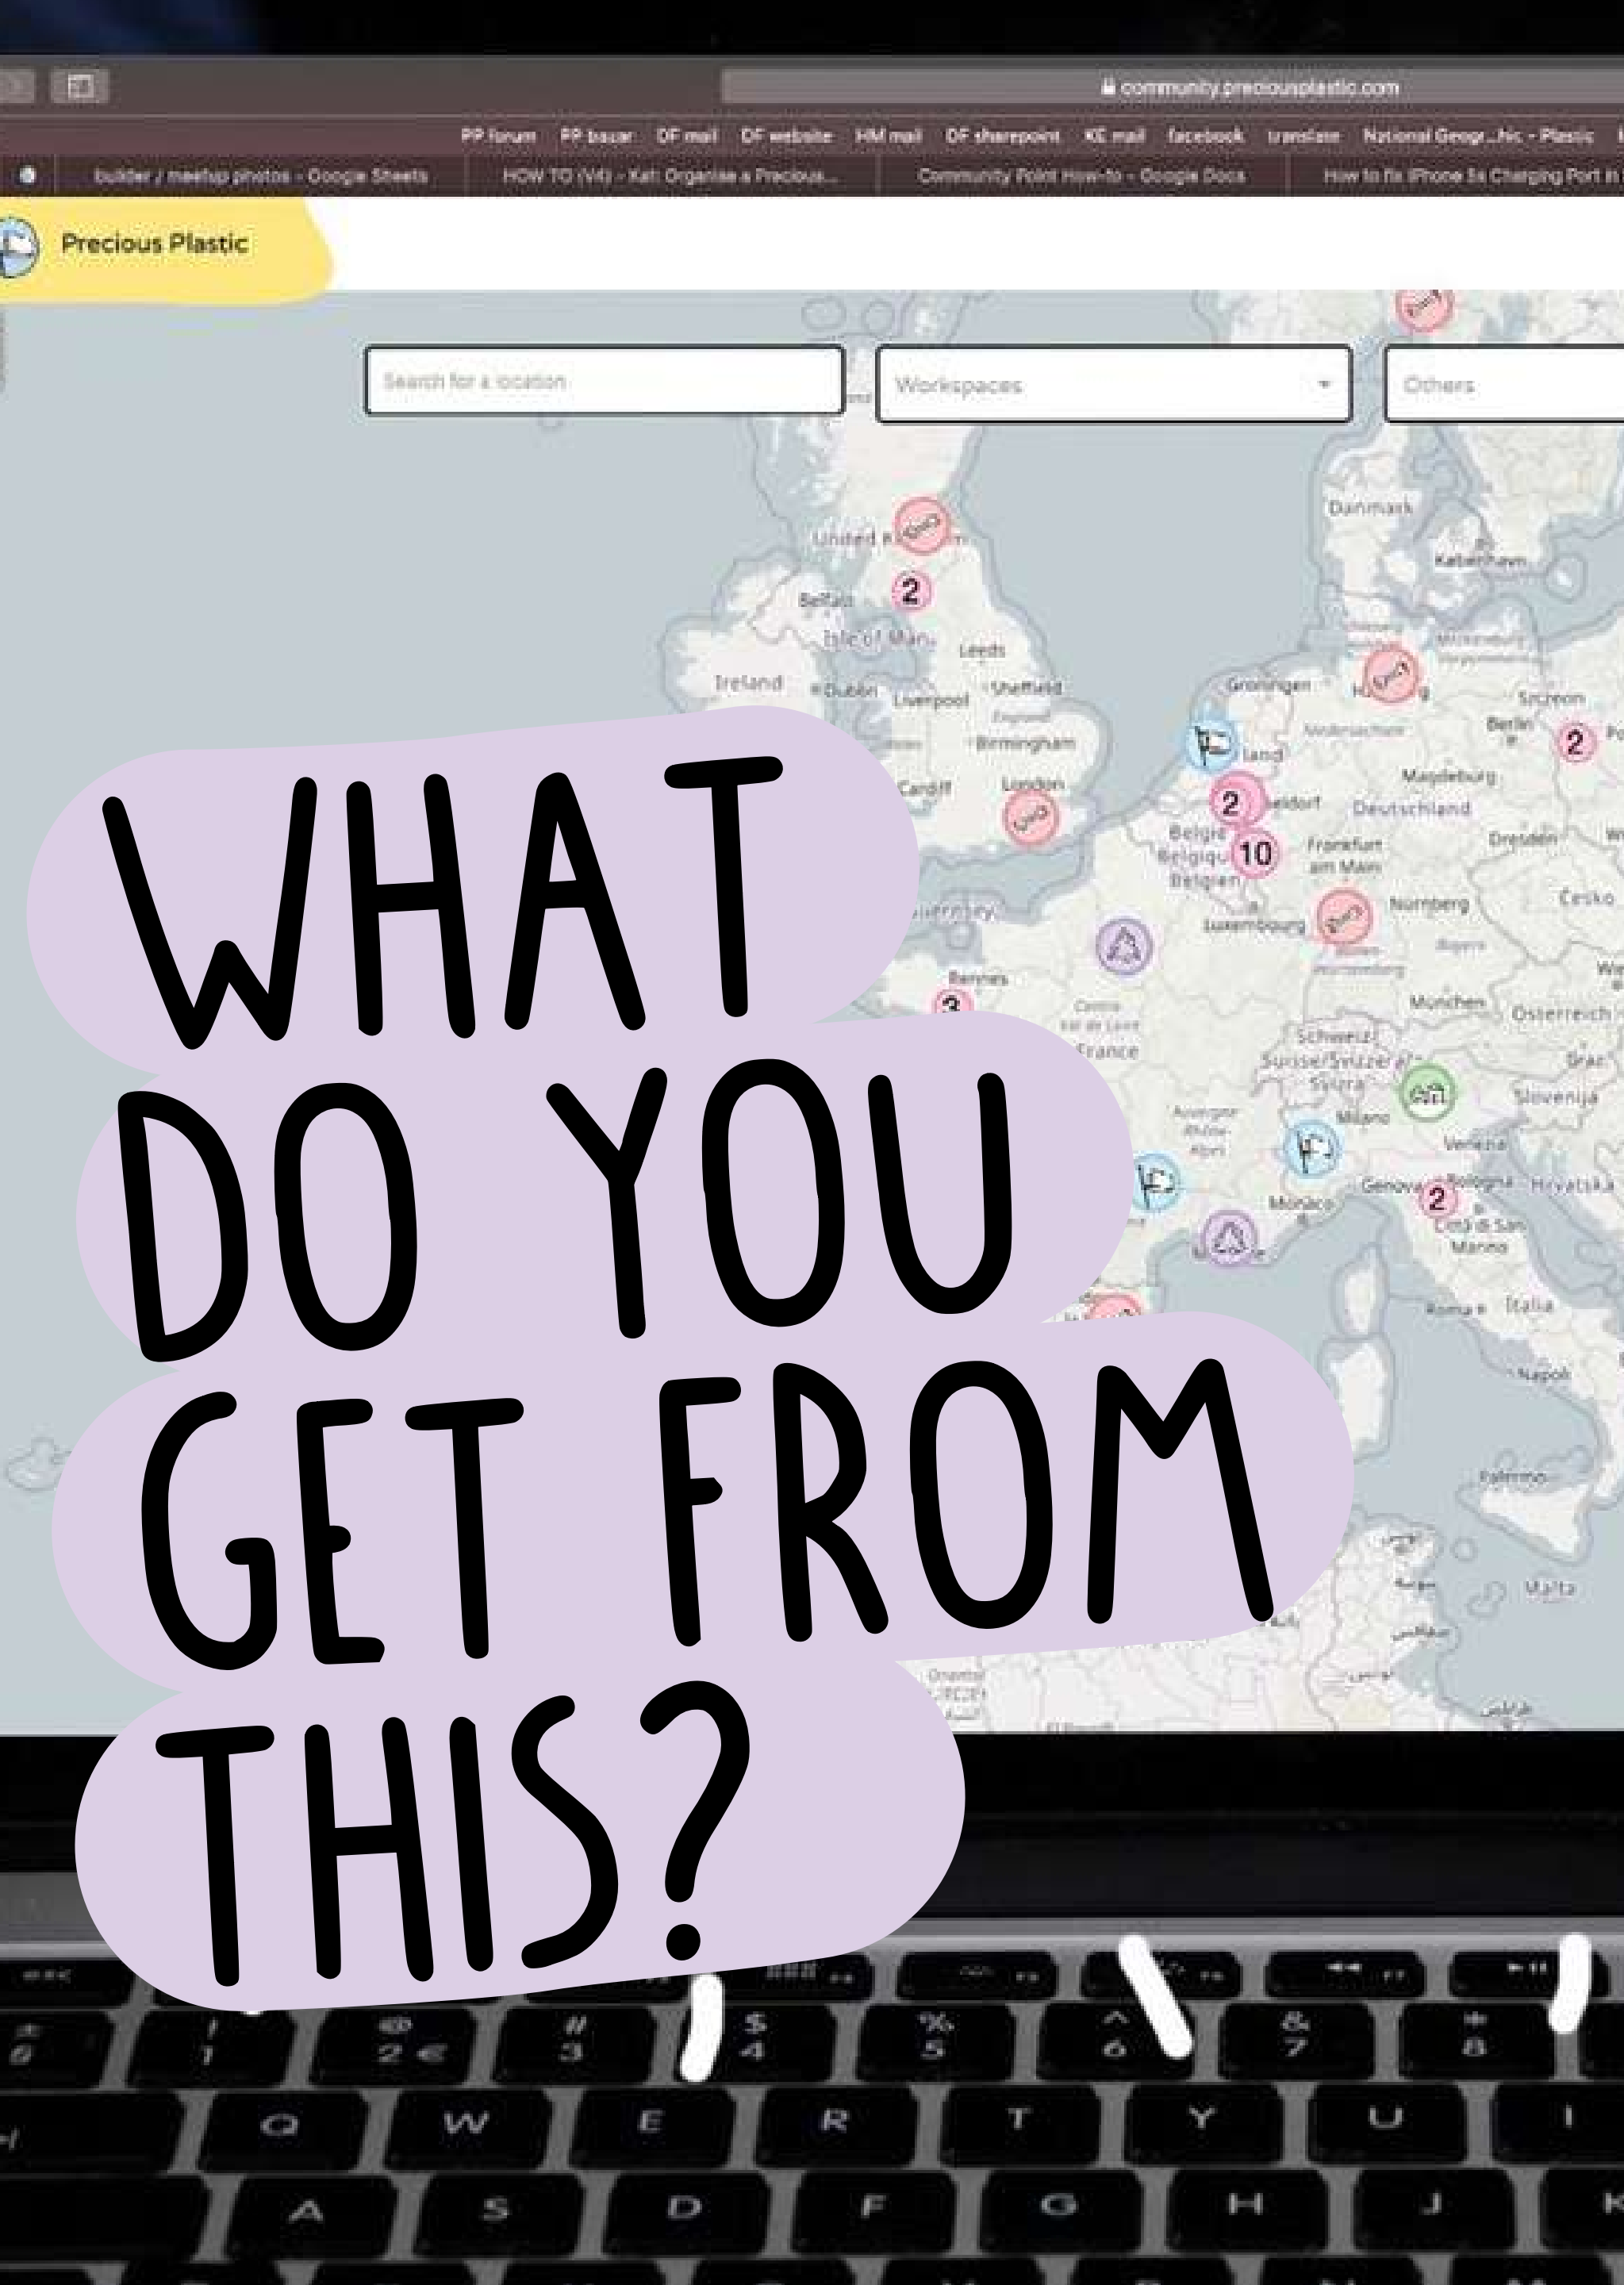

We believe that we should all do our little part to fix the plastic problem. That's why we ask businesses and organizations to clean their plastic and remove the labels before we can collect it.

We try to collect plastic once a week. If your organization or business needs it more frequent we're happy to find a way to make it work.

Plastic pollution is a major problem right now. You're doing your part to fix the plastic problem (bye-bye guilt feeling 😇). Also, you will get a partner sticker so you can talk about your commitment with your customers

**EVERYONE
IS A RECYCLER**

Precious Plastic is an international movement of people and organizations changing the way plastic is recycled.
